SUMMARY

Results-driven backend engineer with 8 years of experience building backend systems on Kubernetes, Microservices, MySQL.

EXPERIENCE

Senior Backend Engineer - Quartzline Digital (2025-2026)

- Owned the Redis event pipeline processing 42M events/day.
- Designed a PostgreSQL-backed data layer that cut p99 query latency by 69%.
- Applied distributed-systems patterns to scale the platform to 468K concurrent users.

Backend Engineer - Wrenfield Technologies (2021-2025)

- Led migration of core services at Wrenfield Technologies onto Go, improving uptime during peak load.
- Built and maintained REST APIs in Elasticsearch serving 811K requests/day.
- Introduced Terraform-managed infrastructure, cutting provisioning time by 40%.

Software Engineer I - Cinder Technologies (2018-2021)

- Designed internal Redis standards used by 31+ downstream services.

EDUCATION

B.S. Computer Engineering, University of Michigan, 2017

SKILLS

- Kubernetes
- Microservices
- MySQL
- PostgreSQL
- Redis
- Go
- REST API design
- Terraform
- TypeScript
- Elasticsearch
- AWS
- Distributed systems
