SUMMARY

Results-driven backend engineer with 8 years of experience building backend systems on Kubernetes, Go, AWS.

EXPERIENCE

Senior Backend Engineer, Vertex Dynamics (2025-2026)

- Designed a Node.js-backed data layer that cut p99 query latency by 60%.
- Applied distributed-systems patterns to scale the platform to 151K concurrent users.

Backend Engineer, Beacon Data (2024-2025)

- Introduced Terraform-managed infrastructure, cutting provisioning time by 50%.

Software Engineer I, Copperfield Cloud (2018-2024)

- Built and maintained REST APIs in Node.js serving 753K requests/day.
- Designed internal Node.js standards used by 13+ downstream services.

EDUCATION

M.S. Information Systems, Penn State University, 2018

B.S. Information Systems, Northeastern University, 2015

Skills: Kubernetes, Go, AWS, REST API design, Node.js, RabbitMQ, System design, Kafka, PostgreSQL.
