SUMMARY

Experienced backend engineer with 16 years of experience building backend systems on System design, Redis, Terraform.

EXPERIENCE

Principal Backend Engineer, Vertex Software (2022-2026)

- Applied distributed-systems patterns to scale the platform to 153K concurrent users.
- Designed a Node.js-backed data layer that cut p99 query latency by 45%.
- Led migration of core services at Vertex Software onto GraphQL, improving uptime during peak load.

Staff Backend Engineer, Wrenfield Software (2021-2022)

- Owned the TypeScript event pipeline processing 60M events/day.
- Designed internal REST API design standards used by 30+ downstream services.

Senior Backend Engineer, Nimbus Computing (2010-2021)

- Introduced Terraform-managed infrastructure, cutting provisioning time by 61%.

EDUCATION

M.S. Information Systems, Northeastern University, 2010

B.S. Information Systems, Cal Poly, 2008

Skills: System design, Redis, Terraform, Go, PostgreSQL, GraphQL, TypeScript, Node.js, Distributed systems, MySQL, REST API design, CI/CD.
