SUMMARY

Senior backend engineer with 5 years of experience building backend systems on MySQL, Node.js, Go.

EXPERIENCE

Senior Backend Engineer - Anchor Dynamics (2023-2026)

- Introduced Terraform-managed infrastructure, cutting provisioning time by 90%.
- Designed a Kafka-backed data layer that cut p99 query latency by 29%.
- Designed internal Docker standards used by 15+ downstream services.

Backend Engineer - Foundry Systems (2021-2023)

- Applied distributed-systems patterns to scale the platform to 394K concurrent users.
- Owned the Docker event pipeline processing 38M events/day.

EDUCATION

B.S. Electrical Engineering, University of Utah, 2021

SKILLS

- MySQL
- Node.js
- Go
- REST API design
- Kafka
- GraphQL
- PostgreSQL
- TypeScript
- Docker
