SUMMARY

Results-driven backend engineer with 14 years of experience building backend systems on Python, RabbitMQ, AWS.

EXPERIENCE

Principal Backend Engineer, Ironwood Analytics (2022-2026)

- Designed a AWS-backed data layer that cut p99 query latency by 56%.
- Applied distributed-systems patterns to scale the platform to 30K concurrent users.
- Introduced Terraform-managed infrastructure, cutting provisioning time by 40%.

Staff Backend Engineer, Larkspur Dynamics (2020-2022)

- Owned the Distributed systems event pipeline processing 25M events/day.
- Led migration of core services at Larkspur Dynamics onto REST API design, improving uptime during peak load.
- Built and maintained REST APIs in Redis serving 479K requests/day.

Senior Backend Engineer, Anchor Cloud (2018-2020)

- Designed internal Distributed systems standards used by 5+ downstream services.
- Owned the Python event pipeline processing 71M events/day.

Backend Engineer, Harborlight Labs (2012-2018)

- Built and maintained REST APIs in RabbitMQ serving 791K requests/day.
- Designed a Python-backed data layer that cut p99 query latency by 31%.
- Designed internal RabbitMQ standards used by 28+ downstream services.

EDUCATION

B.S. Computer Science, University of Maryland, 2011

Skills: Python, RabbitMQ, AWS, MySQL, Redis, Distributed systems, Kubernetes, Node.js, TypeScript, REST API design, Terraform.
